

EDUCATION

It is important to us to take a student's eye view when designing educational environments - to create stimulating, playful and relaxing spaces, which complement learning, yet are also places to forge friendships. These are balanced with practical considerations for durability, connectivity and supervision. Striving for a fluid integration between the classroom and the external spaces, we create adaptable areas, for learning and play.

Primary Schools

Bristol Primary BSF Schools
DKA Architects/Skanaka
Clifton College Prep
