

LANDSCAPE MANAGEMENT

Landscape
Institute
Registered practice

Appleton Group Bristol have over 10 years of experience in providing landscape management services for facility managers, developers and landowners. In each instance we strive to achieve practical solutions and good working relationships.

We work with both private and public sector clients to establish long-term plans of maintenance and management, which ensure projects continue to flourish beyond completion, or act to revitalise existing landscapes. Developing plans based on our understanding of construction, horticulture and ecological principles, we look to provide sustainable landscapes for enjoyment now and in the future.

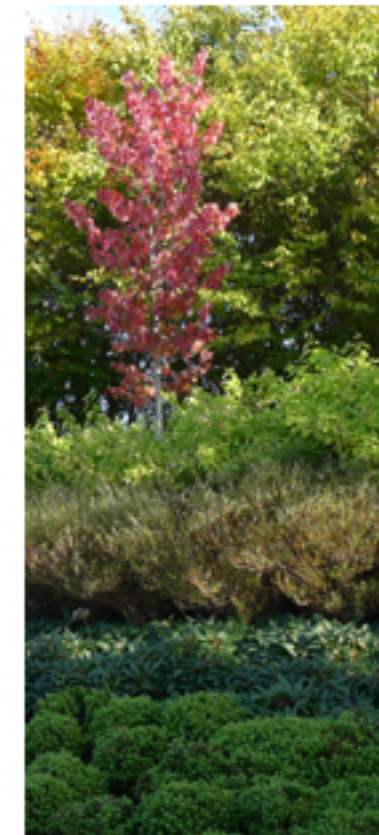

We have specialist knowledge of managing natural turf for sport, having worked with both the Sports Turf Research Institute (STRI) and Rugby Football Union (RFU).

Additionally we can provide professional advice covering project management, finance, law, contracts, and third party issues.

"I really enjoyed my visit and meeting with Marcel. Our conversation sitting in front of the clubhouse was stimulating and I have to congratulate Marcel and Cornish Landscapes on coming up with such a sound plan."

Keith Kent, RFU Head Groundsman, Twickenham
